6	Statistical Office of the Republic of Serbia	Development of the system of leading indicators; 025214	solutions for presentation and dissemination.  The concept of leading composite indicators is an analytical mean in forecasting cyclical trends of the business activity. It encompasses the detection of turning cyclical points, minimum and maximum, in order to result in the anticipation phase of the economic cycle of the domestic economy in the next period. Each of the developed SORS indicators is made of a large number of weighted indicators of every individual sector. In detecting the variables that entered in the presented composite indicators all the macroeconomic areas are analysed, and also the surveys on businesses expectations in Serbia, which is carried out according to Eurostat methodology. The developed system of leading composite indicators precede the economic cycle, on average, by about six months, and when combined with econometric models, enables quantitative evaluation of the dynamics of the annual growth of the economic activity in a short period of time, on quarterly and annual level.	Monthly; next quarter				Statistical surveys of the Statistical Office of the Republic of Serbia	Law on Official Statistics	Republic of Serbia	The 5 <sup>th</sup> of the month
7	Statistical Office of the Republic of Serbia	Analysis of turning points of a cyclical cycle; 025209	Economic cycle represents periodical fluctuations of the economic activity measured by GDP (or other by other indicators) and expressed by the deviation from the long-term trend. Forecasting future trends of the economic cycle is an important analytical means for the preparation of future strategies. By extracting the cycle from the GDP series since 2000, the detection of their turning points	Quarterly; previous quarter				Statistical surveys of the Statistical Office of the Republic of Serbia	Law on Official Statistics	Republic of Serbia	The first 5 days from the beginning of the next quarter

			and Open Data standards as well. Improvement is done concerning data visualisation and development of communication on social media. Access to microdata is made possible for R&D institutions, respecting strictly relevant procedures.								
2	All responsible producers of official statistics	National portal for the monitoring of indicators; 025251	Development of the national portal to monitor quantitative indicators defined in the international statistical system or based on national plan documents, based on the information system with „one-stop-shop“ approach in which data and referent metadata are stored and published in one place and linked with all relevant planning documents.	Continuous							
<b>8. Data security and statistical confidentiality</b>											
1	Statistical Office of the Republic of Serbia	Data security and statistical confidentiality; 025241	Official statistics protects fully the rights of data providers and statistical units. The principle of confidentiality involves data protection referring to an individual unit, but individual data can be used only for statistical purposes. The Law on Official Statistics lays down that statistics producers shall remove identifiers of reporting and statistical units after processing of collected data. Questionnaire and other documents that contain individual data obtained through statistical surveys shall be destroyed after the input, coding and processing of data in line with applicable regulations. Data collected, processed and stored for statistical purposes are confidential when a physical or legal person can be directly or indirectly identified by its name, address or identification number. Confidential data cannot be used to establish rights and create an obligation to the reporting unit. Responsible official statistics producers can provide R&D	Continuous					Law on Official Statistics		

<sup>1)</sup> The territorial level is defined in accordance with the Law on the Territorial Organisation of the Republic of Serbia ("Official Gazette of RS ", number 129/2007, 18/2016 and 47/2018) and Regulation on the Nomenclature of Statistical Territorial Units of RS", number 104/09)

international organizations, etc.). the law is harmonized with the main principles and regulations of the international Regulation concerning official statistics.

2. Law on the Classification of Activities regulates the Classification of Activities, as a general standard according to which the activities of units of classification are defined. The Classification of Activities on European level is the Statistical classification of economic activities in the European Community - NACE. The change of the NACE classification is published by means of Delegated Regulation of the Commission (EU) 2023/137 of 10 October 2022 concerning amendments to the Regulation (EC) No. 1893/2006 of the European Parliament and Council concerning the implementation of the statistical classification of economic activities NACE revision 2. This regulation (in Annex) defines the structure (codes and titles) of the new version of the European classification of activities NACE Rev. 2.1. Article 2 of this regulation defines the deadlines for the implementation based on the reference period of statistical data transmitted by statistical institutions to Eurostat. These deadlines, depending on the statistical area, will be applied gradually, starting from 1 January 2025. The Statistical Office of the Republic of Serbia prepares a text of the draft law on the classification of activities. The New national classification of activities will be fully harmonized with the European classification of economic activities - NACE Rev. 2.1.

3. Respecting the Law on Official

<sup>1)</sup> The territorial level is defined in accordance with the Law on the Territorial Organisation of the Republic of Serbia ("Official Gazette of RS ", number 129/2007, 18/2016 and 47/2018) and Regulation on the Nomenclature of Statistical Territorial Units of RS", number 104/09)
